

TRINITY COMPUTER SCIENCE REU

Faculty Survey

August 1, 2008

Name: _____

1. What do you think is the most valuable component for the REU Program?
2. How do you think the 2008 REU students were well-prepared for research?
3. How many hours on average you spent per week working to support your students? How many meetings you had with students each week?
4. Are you pleased with the outcome of your students' project(s)? If not, why?
5. How do you think the teamwork between students helped address uneven preparation for research and improve the quality of projects?
6. Do you have any publication plan based on the research that has been done this summer?
7. Do you think if there is any lesson that we should learn from this summer?
8. How do you feel that the REU Program has affects on undergraduate students NOT in the REU Program? (You do not need to answer this question. It is a question for year 2-3; I put it here just in case I will forget it.)
